

# Mapping

This section can be classified into three main categories, Interface Sources, Mapping, Profile actions, which are further split into two categories to cover the functions of the traveller as well as the company profiles.

The Interface sources are the "commands" used to create copy actions when mapping fields to the different interfaces.

The technical/ functional details are further broken down into these sections:

- [Mapping - Companies](#)
- [Mapping - Travellers](#)
- [Profile Actions - Companies](#)
- [Profile Actions - Travellers](#)
