

Publishing (Profile Center Tab)

As the name states, "Initiate mass-publishing" can be used to mass synchronize traveller or company profiles. There are further options i.e. to synchronize profiles ie either to all or to a specific interface, only all erroneous profiles (see publishing errors), all company profiles, all traveller profiles or even all travellers of a specific company. Publishing all travellers and/or companies could have an enormous impact to your profiles.

Note: There is no history recorded for profiles synchronized via mass-publishing.

Publishing

Description

Field	Description
Initiate mass-publishing	Click here to start the selection process
Profile Type	Choose between Travellers and Companies  A screenshot of a dialog box titled "Initiate mass-publishing" with a close button (x) in the top right corner. Inside the dialog, there is a section labeled "Profile type" with a light gray background. Below this label, there are two buttons: "Companies" and "Travelers". At the bottom right of the dialog, there is a "Close" button.

The below table and the accompanying pictures show the succeeding steps after selecting the profile type.

Mass-publishing traveller profiles -Steps

Mass-publishing company profiles -Steps
