

Create, Update, delete

To **create** a company profile via CSV, a minimum of the below eight fields have to be present in the file and the last 7 must be populated:

uuid	externalnr	name	shortname	street	zip	place	country
uuid	Customer no.	Company name	Short name	company.street	company.zip	company.place	company.country

To **mass delete** company profiles please add column "metadata.action" with the value DELETE for the company profiles that you want to be deleted. The process is more or less the same as for [updating/ deleting traveller profiles](#)

The **upload** process has been explained under [CSV-File](#)
