## Create, Update, delete

To create a company profile via CSV, a minimum of the below eight fields have to be present in the file and the last 7 must be populated:

uuid	externalnr	name	shortname	street	zip	place	country
uuid	Customer no.	Company name	Short name	company.street	company.zip	company.place	company.country

To mass delete company profiles please add column "metadata.action" with the value DELETE for the company profiles that you want to be deleted. The process is more or less the same as for updating/ deleting traveller profiles

The upload process has been explained under CSV-File
