

Sabre SWS Downline

Please advise full Sabre travel agency name and PCC(s), with the travel agency primary contact name, title, email address, phone number. (The standard SWS Downline setup is to create a new iPCC. If the agency prefers to use an existing PCC for the Sabre Web Services (SWS) access this must be noted on the SWS Downline order which is completed by the Sabre Agency Account Team). Sabre will notify the Sabre Agency Account Team so they can proceed with the addendum signature and IPCC order placement. Sabre Agency Account Team will notify agency of the activation timeline and implementation date once the order is placed. The agency will have to notify Umbrella of its SWS downline credential.

If the Agency has credit card numbers they wish to import from the GDS, then the EPR must have the keyword CCVIEW applied.
