

Evolvi Configuration

Auth. Org. User and password are a requirement to be able to use the interface. These have to be created within Evolvi by the travel agency.

You need to provide us your agency name, the user name and password of the user you have set up in your Evolvi site that we will pass in the API. This user needs to have "Manage Users" and "Manage Organisations" ticked in their policy group. Additional please ask support@evolvi.co.uk to enable the "Profile Integration" for your site.

Company setting

After Activation Evolti interface, the following fields have to be filled:

- Auth. org. username
- Auth. org. password
- Auth. organisation ID

Three custom fields have to be created on the company setup and mapped to the Evolvi fields Unit, Account, and Policy in order to be able to assign these values to travellers as well as on the company profile using the wizard.

Evolvi Field	Source
Unit	EVOLVI_USER_UNIT
Account	EVOLVI_USER_ACCOUNT
Policy	EVOLVI_USER_POLICY
Single Sign-On Details	EVOLVI_ACCESS_TYPE (Validation needed with [LNone=None;SSO=SSO;Web=Web) Mapping the SSO details is optional as opposed to the above three sources which are compulsory.

Wizard

The wizard creates the validation list for travellers as well as company

Label	Mand.	R/W	CSX prefix	GWS	Cytric	Sabre	Evolve	AeTM	Billing	Name	Internal	Field	Validation	Profile type	
Unit	Opt	RE					EVOLV	0	-	Unit		INP		-	
Accounts	Opt	RE					EVOLV	0	-	Acco		INP		-	
Policies	Opt	RE					EVOLV	0	-	Polic		INP		-	

Step 1 | Load options

Load from... ▼

Step 2 | Select options

☒ all ☐ none

<input checked="" type="checkbox"/>	Organisation B	<input checked="" type="checkbox"/>	Child B1	<input checked="" type="checkbox"/>	Child B2
<input checked="" type="checkbox"/>	Child B3				

Step 3 | Settings

☐ Label only
☒ Label and Value

☒ Add empty option

Apply

Cancel

Note:

- Traveller Emails will be used as Evolvi profile number (unique evolvi ID)
- Faces username is used as Evolvi "externalref", therefore username is truncated for externalref
- Publishing can take up to 3 minutes. All the other real time synchronizations are therefore lined up to be executed after successful transmission to Evolvi
