

Get There Configuration

Please contact your GetThere account representative informing you wish to connect Umbrella Faces to GetThere. Include the name and email address of your Umbrella Faces implementation manager.

The GetThere account representative will open a ticket within their Data Integration team who will create API keys, if these do not already exist, and/or provide existing API configuration.

Please specify if you wish to re-direct the GetThere profile to link back to Umbrella Faces – or have Umbrella Faces update the GetThere profile.
