

Release Note 03. December 2020

Profile Center - Read form Galileo

You are now able to import **Galileo Client Files** within the "Profile Center - Import section" . The import of a BAR (company) will also import all related PAR (travelers).

Import

Import option

Read from GDS-Profile

System

Galileo WS

Agency

Umbrella AG

Profile no.

Host Access Profile

PCC

Bulk company import

☐

Import

Field	Comment
Profile no.	Galileo BAR-Title
Host Access Profile	optional, only if differs form the default Agency HAP
PCC	optional, only if differs form the default Agency PCC
Bulk company import	will provide a list of all exisitng BAR's in the PCC

In general, the import logic depends on the Faces Agency configuration (custom publish actions) and is as follows:

- First by line number & matching prefix
- Then by matching prefix, with the longer prefixes first
- All unmapped values will be read into the comment box

Primary Arranger & Approver

A new checkbox is available to nominate a arranger and/or approver as the primary arranger or/and approver.

Custom Field & Custom publish action

Farelogix Field	Source
General Remark	GeneralRemark[@Text <text>{}] <ul style="list-style-type: none"> e.g. GeneralRemark[@Text *ACECRM:{}]

Evolvi - Truncation First name & Surname

Evolvi allows only 20 characters in the Frist Name field and 30 characters in the Surname field. To prevent any error messages with names at time of synchronization we are auto-truncating the First name and Surname.

Trainline - Default Password

In the company profile a new field is available to setup the default password at time of profile creation to Trainline.

Interface setup

Target GDS	<input checked="" type="checkbox"/> Trainline
	Corporate Reference
	<input type="text" value="Corporate Reference"/>
	Default Password
	<input type="text" value="Default Password"/>

Note: default password will be only sent at the time of profile creation
