

# Release Note 15. December 2020

## Two-Factor Authentication

When logged in in Umbrella Faces, the Two-Factor Authentication can be set up on the personal profile. It is not possible to activate it for someone else.

# Welcome Mr. Max Muster

### Login

Username

Max Muster

[Change password](#)[Two-Factor Authentication Setup](#)

To be able to activate Two-Factor Authentication, you need to have an app installed on your device (this can be any Two-Factor Authentication app). The first time you will have to scan the QR-code or enter the indicated secret key directly within the app.

### Two-Factor Authentication Setup

In order to setup two factor authentication, please setup your authenticator app using either the QR-Code or secret key provided below. To confirm successful setup, please enter two subsequent codes in the provided fields.

Secret key

BH3PEEBNVK04YVX3MWLAWT62L3S6JKUE3PQWC2AL62BXV27S2657WBUSKTR6E4UJ

One-Time Code

000000

(Second) One-Time-Code

000000

Enable

Back

Then you will have to enter the first two codes which are generated in the app in Faces, and click on 'Enable' to finalize the activation. You have the possibility to disable Two-Factor Authentication at any time or to generate recovery codes. To be able to do so, you can click on 'Two-Factor Authentication Setup', and choose the desired function.

## Two-Factor Authentication Setup

You have successfully configured two-factor authentication for your login. Should you wish to deactivate it or generate a set of new recovery codes, please enter a two-factor code for confirmation, and continue by pressing the desired button. Otherwise, click BACK.

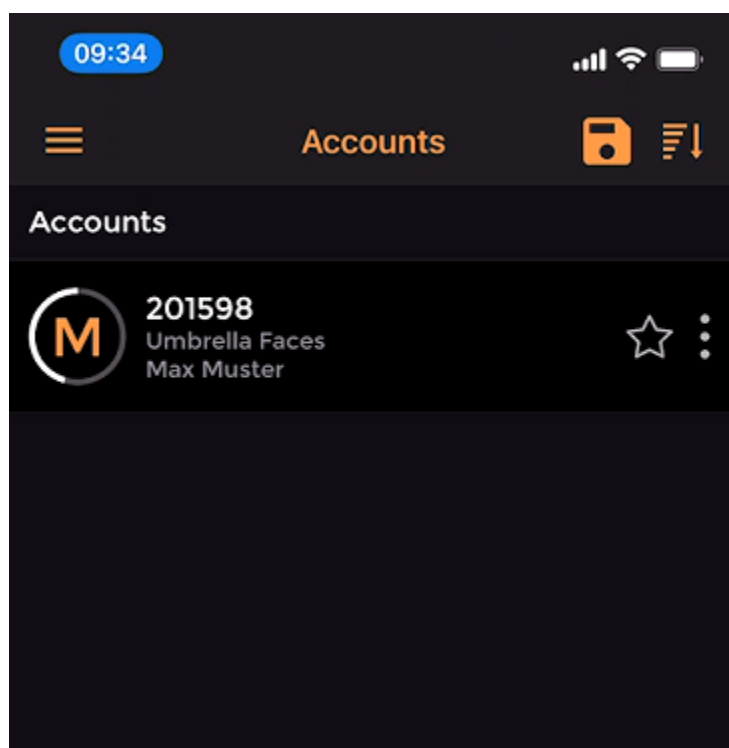

One-Time Code

Disable

(Re-)Generate recovery codes

Back

For generating recovery codes as well as for disabling Two-Factor Authentication, you will have to enter a code generated on the app. Recovery codes are needed in case you no longer have access to your app where the individual codes are newly generated each time. Each recovery code can only be used once.

We strongly recommend not to share this data and codes with anybody else.
