

# Release Note 11. August 2021

## Primary Arranger / Approver

Within the Umbrella Faces UI it is possible to select a primary arranger and/or primary approver. So far this information was not included in the request JSON.

We have improved the handling, and include the additional attribute "primary" in the JSON.

Important: When pushing profile data from external to Umbrella Faces, please make sure to not deliver more than one primary arranger/and or primary approver.

Example JSON:

```
"arrangers": [{  
  "remoteId": "ed48a6c6-858b-412c-86bb-edba382eba90",  
  "email": "demo.arranger@umbrella.ch",  
  "receiveDocs": false,  
  "primary": false  
}],  
"approvers": [{  
  "remoteId": "51016e03-643d-4a0d-9c54-17206cef4f5c",  
  "email": "d.approver@umbrella.ch",  
  "receiveDocs": false,  
  "primary": true  
}],
```

Example UI:

The screenshot displays the 'Arranger / Assistant' and 'Approver' configuration sections in the Umbrella Faces UI. The 'Arranger / Assistant' section includes a search bar with 'Mr. Demo Arranger', an unchecked 'Itinerary / e-ticket' checkbox, and an unchecked 'Primary Arranger' checkbox with an 'Add new' link below it. The 'Approver' section includes a search bar with 'Mrs. Demo Approver', an unchecked 'Itinerary / e-ticket' checkbox, and a checked 'Primary Approver' checkbox with an 'Add new' link below it.
